Complementary feed for dogs and cats

Available sizes:

50g

250g

Supporting Daily Dental Hygiene

NEKTON-Clean Smile is a dental care powder for dogs and cats, specially developed to support oral and dental hygiene. The carefully selected blend can help to soften plaque and makes dental care easier. In this way, daily oral hygiene is gently supported – a simple addition to daily dental care.

Fresh Breath and Well-being

In addition to supporting dental hygiene, **NEKTON-Clean Smile** can also help improve breath freshness. The carefully chosen ingredients are simply added to the daily feed and can be easily integrated into the feeding routine.

High-Quality Formula

The formula is based on high-quality raw materials such as spirulina, chlorella, calcium carbonate, mint powder and brewer's yeast. These ingredients are combined in a way that complements nutrition and at the same time supports oral hygiene.

Easy to Use

NEKTON-Clean Smile is administered once daily by sprinkling it over the food. It can be used with dry, wet, or raw food. For dry food, it is recommended to moisten it slightly so that the powder adheres better. For best results, the product should be given daily for at least 3–4 weeks.

This special combination of active ingredients provides:

- Supports the daily **oral and dental hygiene**
- Can help **soften dental plaque**
- Promotion of **fresh breath**
- Nutritional enrichment with **valuable ingredients**

More information about **NEKTON Clean Smile** and other products for birds, reptiles, dogs, cats and rodents can be found on our website www.NEKTON.de.

Composition:

Ascophyllum nodosum, Spirulina, Chlorella, Calcium Carbonate, Mint Powder, Brewer's yeast

Analytical constituents:

Crude protein 21.6 %, Crude fat 3.2 %, Crude ash 25.4 %, Crude fiber 8.8 %

Additive:

Nutritional additive per kg:

L-lysine 9.000 mg (Monohydrochloride)

Fütterungsempfehlung:

Once daily **0.5 g (½ measuring spoon) per 5 kg body weight** sprinkled over the food.

1 measuring spoon = 1 g NEKTON-Clean Smile.

Precautions:

- Store the product **between 15 °C and 25 °C in a dry place protected from light.**
- We recommend using the product within 3 months of opening.
- For **oral use only** – not suitable for tooth brushing.

TIP:

For optimal results, the product should be given daily over a period of at least 3–4 weeks. The first positive changes – such as noticeably fresher breath or a visible softening of plaque – can be observed after approximately 2–4 weeks of consistent use.
