

NEKTON DOG DETOX

Complementary feed for dogs

Available sizes:

80g 200g

Gentle Support for Detoxification Organs

NEKTON Dog Detox is a high-quality complementary feed designed to gently support the natural detoxification processes in dogs. The specially balanced formulation aids the body during regeneration and supports the physiological detoxification functions of the liver and kidneys – ideal for use as a course.

Plant-Based Support for Liver and Kidney Metabolism

Milk thistle and artichoke have long been recognized for their supportive effects on liver metabolism and help maintain the normal function of this central detoxification organ. Additionally, selected plant ingredients support kidney function, which plays a key role in the excretion of metabolic waste products.

Gut Health as Part of Detoxification

An integrated symbiotic complex of prebiotic yeast cell walls (MOS) and the probiotic bacterial strain Enterococcus faecium contributes to stabilizing the intestinal flora. A balanced gut function is closely linked to the detoxification process and supports nutrient absorption as well as overall well-being.

Focus on Vitality and Immune Support

Vitamin C from natural acerola, together with functional ingredients such as spirulina, turmeric, and brewer's yeast, provides valuable micronutrients. These contribute to supporting the body's natural defenses and overall vitality – especially during periods of increased demand.

This special combination of active ingredients provides:

- Support for **natural detoxification via liver and kidneys**
- Promotion of a **balanced liver and kidney metabolism**
- **Stabilization of intestinal flora** as part of the detoxification system
- Enhancement of **well-being and vitality**

Composition:

Rice, apple pomace, calcium carbonate, milk thistle, artichoke, turmeric, spirulina, linseed meal, brewer's yeast, acerola, nettle leaves, dandelion leaves, yeast cell walls (containing mannan-oligosaccharides with prebiotic properties).

Additives:

Zootechnical additives:

Enterococcus faecium DSM 10663 / NCIMB 10415: 3.5×10^{11} CFU/kg

Analytical constituents:

Crude protein 14.8%, crude fat 5.2%, crude fibre 8.5%, crude ash 4.1%, Calcium 11.9 %, Phosphorus 0.2 %, Sodium 0.05 %.

Feeding recommendation:

Dogs up to 10 kg: 1 g per day
Dogs 10-25 kg: 2 g per day
Dogs 25-40 kg: 5 g per day
Dogs over 40 kg: 10 g per day

A heaped measuring scoop (included) corresponds to 1 g. Recommended course duration: 4–6 months

Precautions:

- Always store the product between **15 °C and 25 °C in a dry, light-protected place.**
- We recommend using the product within 3 months of opening.

TIP:

Mixing with wet food:
Sprinkle the recommended daily dose over the dog's food (canned or homecooked) and mix well to avoid clumps.

Moistening dry food:
If feeding dry food, lightly moisten with water or broth and then sprinkle the powder on top to ensure it sticks.
